Using HiDrive Pro to backup plesk

Head to your Ionos account and go onto your HiDrive:

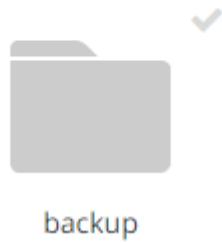

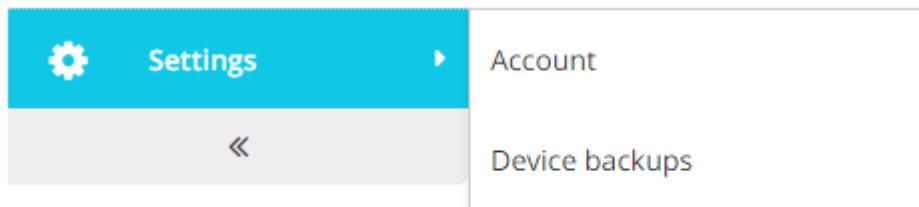

And open your HiDrive:

Create a user and then open the user, create a backup folder:
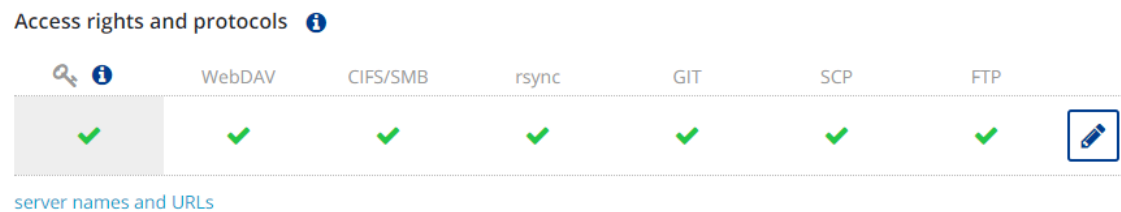

3 folders

backup
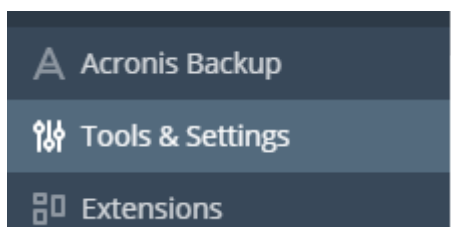

Check FTP is enabled, hover over Settings, then select account:

Settings ▶ Account

« Device backups

Scroll down and make sure FTP is ticked:

Access rights and protocols ⓘ

🔑 ⓘ	WebDAV	CIFS/SMB	rsync	GIT	SCP	FTP	
✔	✔	✔	✔	✔	✔	✔	✏

server names and URLs

Head over to plesk and click tools and settings:

Ａ Acronis Backup

Tools & Settings

Extensions

Click on Backup manager, below tools & Resources:

Tools & Resources
- IP Addresses
- Virtual Host Template
- Mass Email Messages
- Backup Manager
- Migration & Transfer Manager
- Scheduled Tasks (Cron jobs)
- Event Manager

Click on the remote storage settings:

Back Up | Upload | Remove | Schedule | Settings | Remote Storage Settings
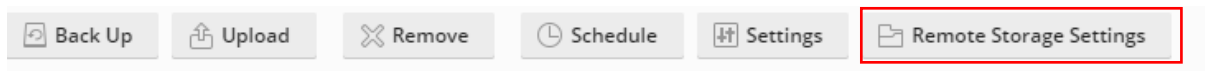

Click on FTP(s):

FTP(S)
Ready for use
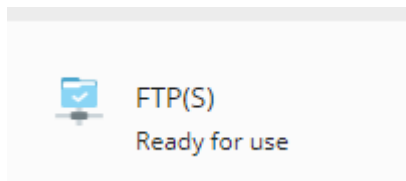

Fill in the options with the following:

Hostname: ftp.hidrive.ionos.com

Directory: /users/yourusername/yourfoldername
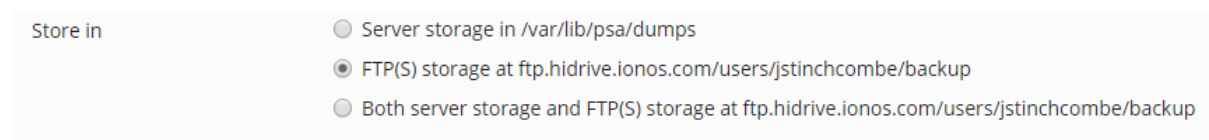

Username: HiDrive username

Password: HiDrive Password

And tick both options

Go back to backup manager and select Schedule:
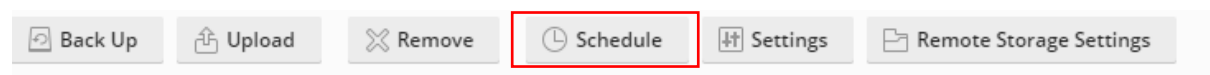

Fill this out to for how often you want it to backup, and tick either both or FTP(S) and save:

To do an instant backup click go back to backup manager and click backup:

Select what you want to backup and tick either both or FTP(S) and done:

That is now set up to do a backup right now and to automatically do backups.
